Subject: FW: Kent 1mg menthol for Japan

C.B. Huang generated the results in the attached document as part of our testing of the Kent Ultra Menthol and Lark Ultra Menthol 100s Pacific Green cigarettes. The results are qualitative menthol and nicotine on a puff by puff basis. Contact C.B. Huang if you have specific questions about this method.

Quantitative menthol data will be reported tomorrow afternoon by Julie May. This is the extent of the results that will be available by Monday morning. We have additional testing in progress.

Please contact Julie or me if you have any questions.

Thanks,
Karen Torrence
